Allowable Subject Matter

4. Claims 1, 3-5 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art of record fails to teach or fairly suggest the combination of all limitations required in claim 1 that includes "... (C) a determining circuit which determining whether or not the ND filter exists on the optical path; and (D) a changing device which, *on the basis of an output signal corresponding to the determination result of the determination circuit*, controls said iris at a *first speed* in a case that said ND filter is *being inserted* into the optical path or is *being detached* from the optical path and controls said iris at a *second speed slower than the first speed* in a case that said ND filter is *on the optical path* or is *out of the optical path*."

Regarding claims 3 & 4, these claims are dependent of claim 1.

Regarding claim 5, the prior art of record also fails to teach or fairly suggest the combination of all limitations required in claim 5 that includes "...determining whether or not the ND filter exists on the optical path; and controlling, *on the basis of said determining*, said iris at a *first speed* in a case that said ND filter is *being inserted* into or is *being detached* from the optical path, and controlling the iris at a *second speed slower than the first speed* in a case that said ND filter is *on the optical path* or is *out of the optical path*."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
